OUR STORY

Rowlett's reputation is built on the hallmarks of craftsmanship, durability and stylish design. Every machine we manufacture is assembled by hand and comes with a generous warranty. This, together with outstanding reliability, means that demand for our equipment continues to grow from new and existing sources.

In search of perfection we continuously update our products and use the latest technology and ergonomic design to enable top chefs to serve up delicious food time and time again.

DID YOU KNOW?

We're in the Guinness Book of Records with the world's longest, largest, fully functional toaster.

..... 6ft long with 34 slots!

REGENT COLLECTION

A robust collection of handmade toasters with a stainless steel top. White or coloured bodies available.

A robust collection of handmade toasters with a stainless steel top and white body. The Regent Collection is Rowlett's long-established toaster range. Select from a wide choice of bread, brunch and sandwich toasters available with variable settings for toasting perfection. Remove crumbs easily with the convenient pull-out crumb tray. Regent Collection toasters switch off at the end of each cycle, but the toast or sandwich remains warm in the machine until removed.

Features include:

- Variable timer with 'Toast Ready' ringer
- Energy efficient rotary slot selector switch
- Neon indicator lamp
- All stainless steel finish
- Every toaster individually tested and certified before leaving the factory
- All parts guaranteed.

CONVEYOR TOASTERS

One of the most advanced conveyor toasting systems available in the market today.

Our conveyor toasters 1400RT and 1500RT feature off-peak power switches (2/3rd power), with the brownness of toast controlled by the speed of the conveyor belt.

The range now offers you the choice of a 1300RT machine producing up to 400 slices per hour, the 1400RT machine with the output of up to 800 slices per hour and a 1500RT version with an option of up to 1200 slices per hour. All machines feature an internal cooling fan, electronic motor control, independent element control and a low friction toast slide that can be used in either 'front only' or 'pass through' operation, and are capable of toasting bread, buns, tea cakes, muffins etc. continuously.

Features include:

- Overheat warning lamp
- Element selector switch with bun mode
- Three phase versions for 1400RT & 1500RT models
- Metal heating elements
- CE compliant

EXPRESS CONTACT GRILLS

The next generation of floating head contact grills.

A floating head contact grill, tried and tested in many high volume food outlets, where 100% reliability is required 24 hours a day. Twin elements in each plate guarantees long life with the benefit of off-peak economy and an even temperature over the whole cooking surface. All cooking plates are coated with the latest high performance material.

Features include:

- Separate cooking surfaces coated with the latest high performance material.
- Free floating top plates adjust to any angle.
- Versatile and powerful, just plug in and use
- Mechanical timer (Models RE100-PING and RE200-PING) with ringer alarm. Can be set from 30 seconds to 6 minutes.
- Economy switch - ideal for quiet periods. Reduces electricity consumption by approximately 30% whilst maintaining the cooking temperature.
- Continuous cooking commences immediately upon re-activation of full power.
- Other features include insulated cool zones to protect electrics from heat and grease; removable splash guards and high capacity fat trays for easy cleaning.
- CE compliant.

MULTIPLE HOT PLATES

Popular machines for keeping food hot.

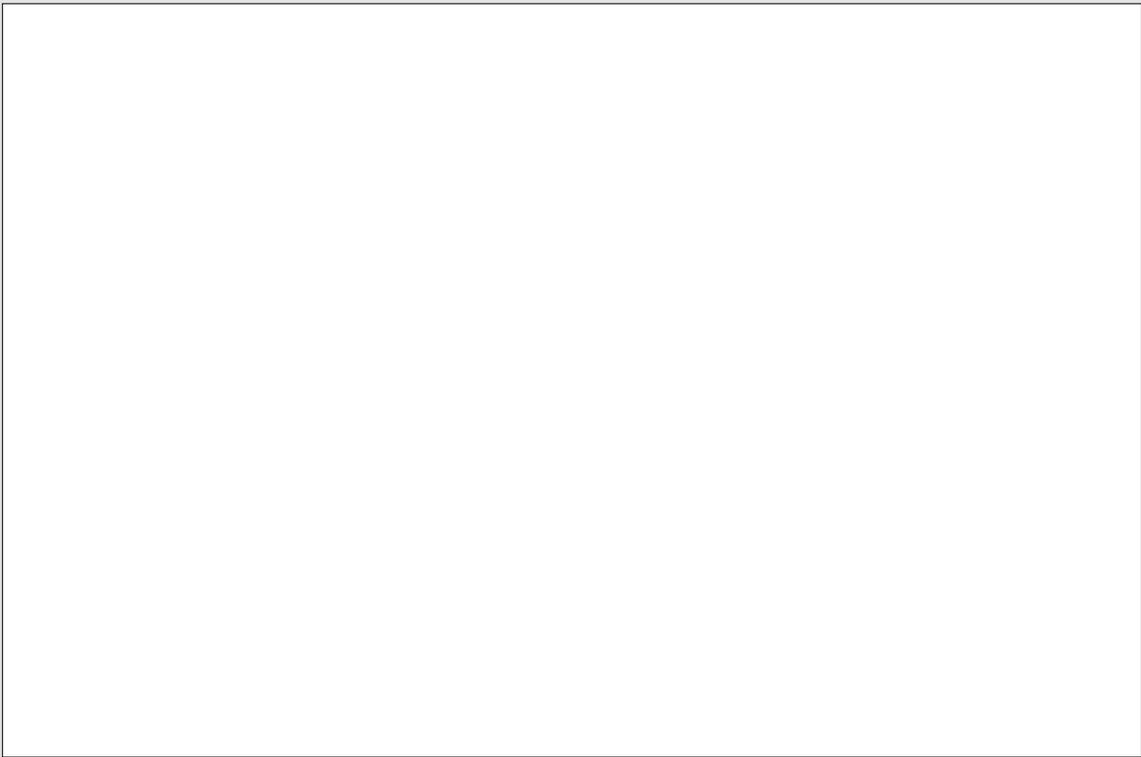

Reliable machines manufactured by us for nearly 40 years. 6 and 10 plate models, both thermostatically controlled. The hotplates themselves are manufactured from polished aluminium alloy. The plates have a high heat accumulating power, capable of retaining heat for up to 45 minutes without the need to reheat- quite sufficient for one meal.

Features include:

- Simple to use
- 6 and 10 plate models available
- Reliable machines which have been sold for nearly 40 years
- Thermostatically controlled
- Polished aluminium alloy hot plates (272mm x 150mm) which heat up quickly
- The unit is ready to use 35 minutes from cold - quite sufficient for one meal
- 13 amp connection
- When replaced in the heating cabinet, the plates are ready to use again in about 15 minutes
- CE compliant
